EDUCATION

University of Toronto

Toronto, ON

B.A.Sc. Computer Engineering, Minor in Business and AI (PEY Co-op)

Aug. 2024 – May 2029

- GPA: **3.84/4.0** (3.91 this year) | Dean's Honour List: Fall 2024, Winter 2025, Fall 2025.
- Courses: Data Structures & Algorithms, Machine Learning, APS360 Deep Learning (PyTorch, in prog.).

RESEARCH EXPERIENCE

Undergraduate Research – AskAlan, LLM-Powered Course Assistant

May 2026 – Present

University of Toronto, Dept. of Electrical & Computer Engineering

Toronto, ON

- Writing the group's findings for publication, supervised by Prof. Salma Emara (in preparation).
- Ship production changes to an AI assistant serving students across **19 live courses**.
- Led zero-downtime search migration of **118K** docs, validated on **8,029** replayed real queries.
- Ran controlled embedder evals (labeled metrics, automated harness); results drove a model swap.
- Cut retrieval latency **40%** on the production path; found a config bug worth 13 pts of Recall@1.
- Built per-course cost tracking across 5 model providers; locked down an exposed data cluster.

WORK EXPERIENCE

Founder – AI Consulting & Training Practice

May 2026 – Present

AI automation for small operations-heavy businesses

Toronto, ON

- Shipped a voice-to-estimate pipeline: voice memos become QuickBooks estimates and Trello task cards.
- Engineered prompt caching and catalog trims to hold AI cost under \$0.30 per processed estimate.
- Built client-facing Claude API tools: document summarizer and operations report generator.
- Train nontechnical owners and staff to run AI workflows themselves, with documented handoffs.

Software Engineering Intern

May 2025 – Aug. 2025

Aspire Software

Lebanon

- Delivered 5 client software products end-to-end; resolved 15+ bottlenecks, cutting latency **35%**.
- Achieved **95%** test coverage with data architecture supporting 1,000+ daily transactions.

PROJECTS

Cross-Style Multimodal Retrieval, Deep Learning Capstone | PyTorch, SigLIP 2, LoRA

Aug. 2026

- Built a 4-style image retrieval system on a self-collected 23K-pair, 1,025-class, 7-language dataset.
- Benchmarked zero-shot first to isolate the failure mode: retro sprites at 0.48 top-1 vs. 0.94 modern.
- Fine-tuned **0.08%** of a 375M model with LoRA: hard-domain top-1 rose 0.48 to **0.68**, zero forgetting.

TEACHING & LEADERSHIP

Les Scouts du Liban – Elected Troop Leader

Sept. 2016 – Aug. 2024

8 years of youth mentorship and community service

Lebanon

- Led 9 scouts; organized food drives feeding **500+** families and 80+ hours of community service.

Private Tutor – Math, Physics & Chemistry

Apr. 2023 – Present

Ongoing teaching of high-school and university students

- Taught hard concepts simply for 3+ years, building review materials and problem-solving strategies.

TECHNICAL SKILLS

AI: PyTorch, LLM APIs (Anthropic, Cohere), RAG pipelines, retrieval & embedder evals, Claude Code, Copilot

Languages: Python, TypeScript, JavaScript, SQL (PostgreSQL), C/C++, HTML/CSS

Frameworks & Tools: Next.js, FastAPI, React, Node.js, Supabase, Elasticsearch, pgvector, Docker, Git, Linux

Practice: Experiment design, workflow discovery, stakeholder translation, documented handoffs

Spoken Languages: English, French, Arabic, Spanish (DELE B2 certified)
